

NO OPEN SEASON

ON THESE PIGEONS

Albuquerque, N. M., Oct. 12.—Uu-merous reports that hunters were killing bandtailed pigeons have been received by the Albuquerque Game Protective association. It is said that an impression exists that the closed season on these birds had expired. The association points out that the killing of bandtailed pigeons is prohibited at all times throughout the United States by the new federal migratory bird law. The bandtailed pigeon is a large, stocky bird about the size of a domestic pigeon, and is found mainly in the mountainous districts. It has been increasing in numbers since protected by the federal law.
